

PetroLine ATG – Cloud Service

Rent solution for online request of OptiLevel tank content management data via Internet with browser, tablet or smartphone. From everywhere at any time.

System overview

With help of the PetroLine ATG Cloud service solution as a service the tank inventory data of your gas station network is always retrievable via internet at any time.

There is no need for an App or Installation of Software.

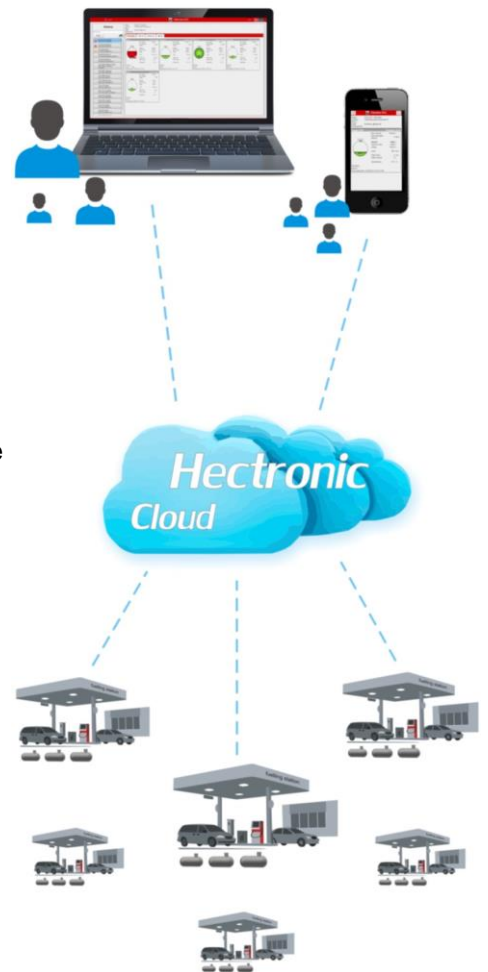

All you need are the OptiLevel probes + controller and an Internet connection, Hectronic is taking care of the rest.

The current stations data will be stored and controlled in the Hectronic cloud. The access to your stations will be established via the Hectronic own website address and your individual user name and password entry.

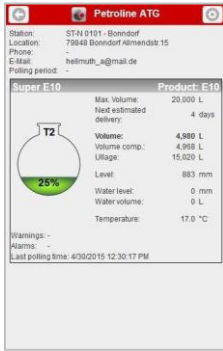

As a service only one-off fee for configuration and the monthly fees for your tanks/ probes are to pay.

One user of one gas station or many numbers of users of a whole gas station network, we are providing the optimal solution.

The whole function range of PetroLine ATG you will find in the corresponding datasheet “Produktdatenblatt PetroLine ATG_EN”

PetroLine ATG - Cloud Service

Rent solution for online request of OptiLevel tank content management data via Internet with browser, tablet or smartphone. From everywhere at any time.

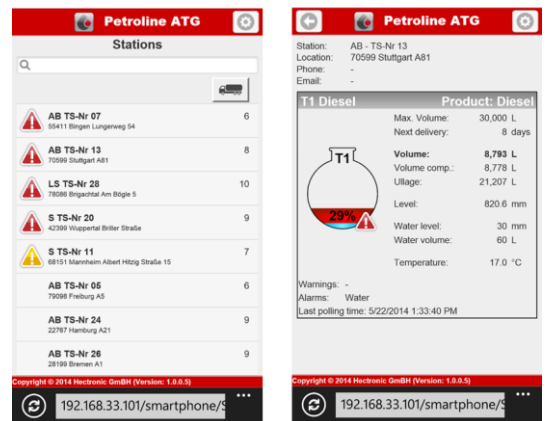

Your benefit as a sales partner

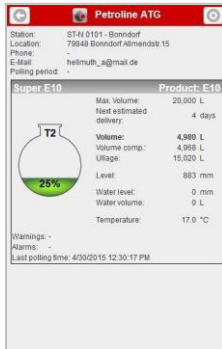

- Monthly period earnings instead of one time sale ➔ customer loyalty
- Hectronic charges to sales partner as agreed in contract and price list, sales partner charges to end customer
- Interesting for customers with only 1 tank as well as whole gas station networks
- Benefit for end customer: only small fees instead of one time high investment
- No installation effort for partner and end customer, software will be operated by Hectronic
- No server hardware necessary
- Always the newest version available, maintenance of software by Hectronic
- Current information, warnings and alarms available at any time
- For each user of a customer different stations and email notification can be assigned
- Including reports (inventory, deliveries, turnover etc.) for selectable stations and date/time.
