PetroLine ATG Cloud Service

The solution for online request of
OptiLevel tank content management data.

PetroLine ATG – the exact view into the tank, from everywhere at any time

PetroLine ATG makes it possible to recall tank content management data online via a PC browser, tablet or smartphone, at any time and from anywhere in the world. The well-structured and uncluttered user interface is quick and intuitive in its design.

System overview:

In order to use the PetroLine ATG Cloud Service, no software or app installation is necessary. All you need on site are OptiLevel HLS probes, Hectronic controller and an Internet connection. Hectronic is taking care of the rest.

The current stations data will be stored and controlled in the Hectronic cloud. The access to your stations will be established via the Hectronic own website address with your individual user name and password entry.

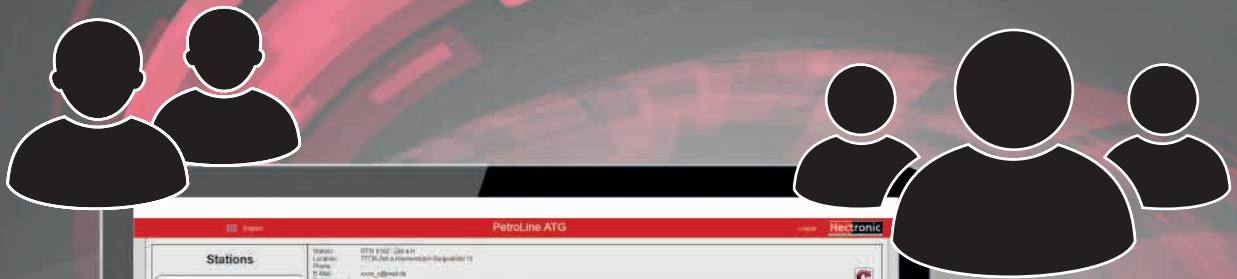

As a rental solution only one-off fee for configuration and the monthly fee for your tanks/probes are to pay. This applies to individual petrol stations as well as entire networks. We offer the ideal solution.

**RENT
INSTEAD OF BUY**

Your benefits:

- Interesting for customers with only one tank as well as whole gas station networks
- Small fees instead of one time high investment
- No installation effort, software will be operated by Hectronic
- No server hardware necessary
- Always the newest version available, maintenance of software by Hectronic
- Current information, warnings and alarms available at any time
- For each user of a customer, different stations and email notification can be assigned
- Including reports (inventory, deliveries, turnover etc.) for selectable stations and date/time
